

Ink Data Sheet:

YLG3364 Yellow Opaque Pigmented Ink

Description:

YLG3364 is a yellow opaque pigmented ink for use in standard **alphaJET C[®]** and **E[®]** printers. No stirring or agitation is required. Printed codes are highly visible on light and dark surfaces. Produces bright, *opaque* codes on light and dark surfaces. Excellent adhesion PVC, PE and nylon. Chemically resistant when printed on hot nylon. All the advantages of pigments (light fast, heat stable, will not migrate) with the convenience of a dye based fluid.

YLG3364 is a ketone-based, yellow opaque ink. Similar inks available in red, orange, and high intensity orange.

Drying time is <2 seconds, depending on the temperature and humidity of the environment. *Printing on cold surfaces or in wet environments will affect dry times.*

Applications:

Recommended for printing copper, plasticized PVC and hot nylon.

Benefits/Advantages:

- Place codes on a wide range of surfaces (light and dark) without changing inks
- Bright, opaque codes without a pigmented printer
- **GEM[®]** pigment dispersions are made in-house to the highest ink jet quality standards

Make Up and Cleaning Solution Requirements:

CLG3364 Make Up/Wash Fluid Available in four (4) liter cases or one (1) gallon

Recommended Nozzle Size:

55 or 70 micron

Shelf Life:

YLG3364 has a shelf life of 12 months from the date of manufacture. For best results store between 40°F and 90°F. To assure optimal performance use fluid prior to the expiration date provided on each bottle.

Typically in stock and available for shipment within 24 hours of receipt of order

All GEM fluids are RoHS compliant.

Designed & Manufactured in the United States
